

Analysis and Insights of WeRateDogs Twitter archive

Tweets posted by WeRateDogs decreased over time

WeRateDogs, a Twitter account started in 2015, tweeted a lot in its starting days. For example, it posted around 300 tweets in the month of November 2015, which increased to around 350 tweets in exactly the next month. However, its tweeting activity reduced drastically in the subsequent months, averaging between 50 to 100 since April, 2016.

Most dogs are rated 12/10 - 10/10 is a close 2nd, followed by 11/10

Most of the dogs are rated 12/10 (*i.e.* 455 out of 1994 dogs). Excluding the 2 rating outliers (420 and 1776), the highest rating received by any dog is 14/10. However, only 2% (*i.e.* 37) dogs got this rating. So, we can say that WeRateDogs is probably very conservative when it comes to rating a dog the highest.

Retweets and Favorites analysis

The above plot shows an increasing trend of *retweeting* and *favoriting* tweets posted by WeRateDogs' since November, 2015. However, the *favoriting* trend shows a much higher increase with time as compared to the *retweeting* trend.

This shows the tremendous growth of WeRateDogs' popularity in a span of less than 2 years.

Scenario	Average Retweet Count	Average Favorite Count
<i>For the entire archive</i>	2767	8919
Dog is rated greater than 10	3845	12825
Dog has a name	2741	9397
<i>Based on the 4 "dog stages"</i>		
Doggo	6701	18418
Floofer	4739	13639
Pupper	2349	7170
Puppo	6976	22623

From the above table, it is evident that tweets of dogs that were rated above 10 by WeRateDogs, were *retweeted* and *favorited* more by almost 40%. However, tweets which mentioned the dog's name had no such impact.

Another interesting point is the huge increase in *retweeting* and *favoriting* of tweets having a mention of the "dog stage" (i.e. Doggo, Floofer or Puppo), the exception being Pupper. Pupper, being a small doggo, usually younger, is probably less popular as compared to its older counterparts.

Having said that, I can see a strong correlation between tweets mentioning the "dog stage" and its chances of being *retweeted* and *favorited* more.

At the end... some trivia

WeRateDogs has posted 98% of the tweets from iPhone

Out of the 1994 tweets, 1955 were posted from iPhone. Just a confirmation that the only mobile device WeRateDogs uses to post tweets is an iPhone.

Charlie is the most common dog name

11 of the dogs were named Charlie and its the most we have. A close second will be Lucy, Cooper and Oliver, with 10 dogs being named as these.
